Cleaning Care for Your CLA Reel

Cleaning Instructions for the CLA Reel

We recommend that you clean your reel after each use, especially after exposure to a salt or alkali environment.

When cleaning the reel, the drag must be fully disengaged. The Drag Knob (4) must be rotated counterclockwise until the stopping position is reached. Use fresh water to flush salt and debris from the drag system. For better cleaning results, separate the Spool (1) from the Frame (3) by pressing the Spool Release Lever (2), soak both in warm fresh water and then rinse in fresh running water. Completely dry the Spool (1) and the Frame (3) before storing the reel.

Solvents should not be used for cleaning the reel.
